

Food and Beverage Services

Warm Beach Camp provides healthful and delicious meals served buffet style in one of four different locations. Our main dining room in Cedar Lodge serves those in the conference center, while W-Bar-B Ranch, Bayview Ranch House, and Chinook Village have meals catered to their locations.

Care is given to provide nutritionally balanced food on the buffet line, which meets a broad range of dietary needs and preferences. Individualized meal plans are not offered; however, for guests with dietary restrictions, there are places with refrigerators, microwaves, and counter space where they can prepare their own supplements.

Warm Beach Camp Food Services develops menus at least two weeks ahead of time. Much care goes into creating a menu that will satisfy and delight each person we are serving. Menus can be provided to group leaders ahead of time in order to communicate what will be served to attendees. Detailed nutritional information can be requested by the group leader for those attendees who are trying to determine what kinds of supplements they may need to bring.

Special banquets and snacks may be ordered from Warm Beach Camp at an additional fee. Please contact Guest Services for the latest Banquet and Snack Menu and pricing. Groups are welcomed to bring their own snacks and beverages provided these are not temperature sensitive and thus prone to health risk. While cooking facilities are not available, most meeting rooms have refrigeration, microwave, coffee, hot water, and counter/sink space.

Food and beverages are a vital part of every event. Whether socializing or fueling up for an afternoon of free time activity, a quality food experience is important. Our goal is to provide food and beverages that will satisfy and delight guests in quality, taste, presentation, and healthfulness.

Note: We do not cook with or provide peanuts in our food or vending machines. We strive to avoid the purchase of products containing peanuts and other allergens, although it is not possible to guarantee our facility is 100% free from such foods.
